SUMMARY

road, louder, probated, bothers, care, workplace, fact, intentionally, freakin, loud, enforce, today, race car, volts, distinctive sound,

SPEAKERS

00:01

So here it is 9:45pm, and about 15 minutes ago, maybe a little bit more than that. I her our dear friend and they said my sight it has a very distinctive sound it's very to. I mean I've never anything that. I've never anything else other than sounds it. In fact, the first time I it I was, I remember up and saying, What the is that until I saw it, you know cuz it was so freakin loud and it was but, yeah, it's 930 at that may have made at 930 at and the guys running the roads, 930 at and I swear I it So that's twice today that I've it, which would make it everyday this week. It's been going on the road. I'm wondering if they don't even care it it enforces. I'm wondering if County, local law enforcement doesn't even care to enforce the fact that these are stats was Because as I was coming into town today probated. I saw one. And this was, this wasn't nearly a three side by side. This was not nearly a three this was more or less a one, a much smaller one. One that's made for foreign workers, something that. Um, but I saw one in the workplace. plain view of everybody. And he was, you know, sitting in the workplace and the only way he'd gotten there is by using the roads. So, appears to me that they're not this is not a concern of theirs. They don't care. But yeah, so anyway, been hearing it It is Friday after all. So it's definitely time for the weekenders to get out. And for me here I'm all long. So, but I'll talk to you later. yeah I it twice today. That would make it every time, every day this week. It's hit the road, and we're on the roads. So we're not, I don't really care the fact that it's to have a road, but it's the fact that the thing is not doesn't have a and straight pipe. And it's intentionally designed to be loud. And it's intentionally designed to be disruptive. And it has a noise is anything else. And I can hear it louder. I mean it's louder than anything else in the area. And that's what bothers me about it is it's louder than 16 wheelers they're flying on the highway, it's larger than 16 volts, it's louder than any modify It's louder than any race car. It's allowed to sing on the foot on the road. And that's what bothers me. And the other thing that bothers me is, is that it runs all long. So, but anyway.
