So you need to get a piece warrant out for Yeah, so I wouldn't stapled up the other one. The one in front my house, the sign in from my house and then I happen to be thinking, I wonder. Wonder about that one that sits on top of the hill and walked up there and guess what? That one had been undoubtedly off the tree and thrown burn in the So it had six staples in it to you and these were in the center. These are center three staples that are in the center of the poster. We don't have wind that is that gusty. And the plastics in better condition and out of all them. That one the one on top the hill was least exposed to the environment to winds. The one that was that extends the most exposed is the one is one that's set up by the well house. There's three of them the one that's sitting closer to my grandma's house up until the wheelhouse that was the one that's exposed most to environmental conditions. And it's still on it's only the ones where he could stop his hop out and the sign off. Also, the sign shows signs of stress being put on one of those corners of how it's warped. The plastic has been and warped. So yeah, there's no doubt no doubt. So that's ventilation of Van vandalization and private property. So the enclosure about here
