SUMMARY

 mailbox, position, other side, pear tree, diagonally, measurements, fence post, post, suffice, side, previous, reference points, minute, house, tree, front, officially, satellite, view

00:00

To save you 305 305 From dangling from the tree that's in the middle of the pear trees sides 305 diagonally, and then that's 43 to the post to the post on this side and then it's I can't remember which posted it is, but I'll do the mailbox

00:43

let's go  here, because you have to use reference points, the correct reference points

00:53

from here

01:01

know where is the there it is

01:16

you don't have a direct view

01:27

it's somewhere around 45  to the mailbox somewhere around that and then to my second position

01:45

I get it right. I'm getting at seven minutes and that can't be right. If that's at seven then then the mailbox is not isn't more than that

the mailbox is not isn't more than that.

02:05

Yeah, so I got 150 the fence posts in front of the mailbox. So that has to be a better representation. And then all I gotta do is come across here. I'll take another step or two and then you got you got 100 [REDACTED] of the house and a lot of move to get a shot through this evening move.

02:47

143 But that should be right. So, all right. Let's hold on a minute. Let's see me. Get around here get another So he's gonna get a satellite through

03:06

193 [REDACTED] to the [REDACTED] On this side. is what it looks [REDACTED]

03:17

yeah, I'm 90 [REDACTED] from this position. It is officially

03:24

[REDACTED] [REDACTED] to the to the fence post. it's 76 [REDACTED] in the mailbox and it's 70 [REDACTED] to the pear tree. And from my other position it is officially 16 [REDACTED] from my previous position. So it gives me a set of set of measurements. It's good to go so I'll move to the other side and see when I get there okay, I guess I'm kidding you're on the [REDACTED] Alright, so from road to my house is about 6768 [REDACTED] which times three it's really 190 feet, somewhere around that and looking [REDACTED] from my secondary position sorry from other measurements going for me to the mailbox. It's 15 [REDACTED] from the front to the furthest pins. Post

04:47

is 80 [REDACTED] So there's that. So 80 [REDACTED] and then I'm gonna take another diagonal measurement cross to the other side

05:10

that's 200 [REDACTED] diagonally from my position across to the other end. It's 200 [REDACTED]

05:21

05:11

And then yeah, maybe wrong about that. It's [REDACTED] 200 And then from here to house. It's roughly 100 And I'm not really an access to see that other than other side. But

05:44

suffice to say it's probably two [REDACTED] Saying definitely, so. Alright, well, I won't see [REDACTED] got one. Okay, so my new position is I'm talking about [REDACTED] and the hitbox. I'm 10 years from my previous plan position.

06:13

I'm 75 in the fourth and fifth post and well I got 200 [REDACTED] from house which that executive your father from my previous management can't be right. That's the truth.

06:43

That's 100 [REDACTED] Yes. 200 [REDACTED] Looks [REDACTED] 200 [REDACTED] and then behind the house

06:58

he has already

07:12

Yeah, I really can't see I really can't see that for this first foot. Suffice to say

07:22

the houses it's 200 [REDACTED] it's probably gonna be [REDACTED] three All right. Well, that's that's enough for measure. It's for now I'm gonna go in the [REDACTED] of digital zoom.

07:31

You
